

Table of Contents

| | |
|--|----|
| Part I - The Digital Clockwork Universe | 1 |
| Chapter 1 – Introduction to Part I..... | 2 |
| Unanswered Questions | 2 |
| Is the Universe Equivalent to a Computer Simulation? | 3 |
| A Digital Clockwork Universe..... | 5 |
| Chapter 2 – Introduction to Computer Simulations | 6 |
| Example Simulation - Weather Forecasting | 6 |
| Weather Forecasting versus Simulating the Universe..... | 8 |
| The Simulation Cycle | 10 |
| Chapter 3 – Can Computers Simulate the Universe?..... | 13 |
| Are Scientific Laws Usable in Computer Simulations?..... | 13 |
| Is the Universe Analog or Digital?..... | 14 |
| Chapter 4 –The Physics to Simulate..... | 19 |
| Subatomic Particles | 19 |
| Radioactive Decay of Unstable Objects..... | 21 |
| Vector Fields | 22 |
| The Four Forces of Nature..... | 23 |
| Gravitational Force | 24 |
| Electromagnetic Force..... | 25 |
| Strong Force | 26 |
| Weak Force..... | 26 |
| Virtual Particles..... | 26 |
| Light..... | 27 |

| | |
|---|----|
| Chapter 5 –Framework for Simulating the Universe | 28 |
| The Building Blocks of the Boxel Architecture..... | 28 |
| Adjacent Boxel Coordinates | 30 |
| A Boxel Universe without Edges or Boundaries | 31 |
| Chapter 6 – The Simulation Cycle | 34 |
| Boxel Architecture Simulation Cycle..... | 34 |
| Balanced Design | 36 |
| Simulation Time, Boxel Size and the Speed of Light..... | 38 |
| Oblique Movement..... | 39 |
| What Is the Simulation Time Interval? | 40 |
| Chapter 7 – How Physics is Implemented..... | 42 |
| Vector Fields | 42 |
| Changes in Vector Fields..... | 43 |
| Gravity | 44 |
| Electricity | 44 |
| The Effect of Vector Fields on Particles | 44 |
| Particle-to-Particle Interactions..... | 45 |
| Tunneling to a Destination | 45 |
| Light | 46 |
| Chapter 8 – Computer Simulations of the Very Large | 48 |
| Can the Boxel Architecture Simulate Black Holes?..... | 48 |
| Can the Boxel Architecture Simulate Cosmic Expansion? | 48 |
| Boxel Splitting..... | 51 |
| Can the Boxel Architecture Simulate the Red Shift of Light? ... | 52 |
| Can the Boxel Architecture Simulate the Big Bang? | 53 |

| | |
|--|----|
| Chapter 9 –Computer Simulations of the Very Small | 55 |
| How Large Would the Computer Complex Be? | 55 |
| Observation Leading to a Wave Function Collapse | 56 |
| Is There a Need for Quantum Mechanics? | 58 |
| Quantum Mechanics versus General Relativity..... | 60 |
| Chapter 10 – The Universe versus Our Models..... | 61 |
| Does a Simulation of the Universe Need Pi? | 62 |
| Is Integer Arithmetic Enough? | 64 |
| Simulations of the Subatomic World..... | 68 |
| Chapter 11 - Conclusion to Part I..... | 70 |
| Building the Perfect Simulation | 70 |
| The Universe is Equivalent to a Computer Simulation of It..... | 72 |
| | |
| Part II - Is The Universe a Computer Simulation?..... | 73 |
| Chapter 1 – Introduction to Part II..... | 75 |
| Virtual Reality Goggles and Body Suit..... | 75 |
| Telling the Difference | 76 |
| Chapter 2 – Philosophical Questions | 77 |
| Chapter 3 - Computer Simulations Have a Purpose..... | 85 |
| Chapter 4 - Emergence | 88 |
| Emergent Ladder of Science | 90 |
| Chapter 5 – Irreducible Complexity for a Purpose..... | 93 |
| Parameters Consistent With Life | 95 |
| Intelligent Life..... | 98 |

| | |
|--|-----|
| Chapter 6 – Mankind’s Experience Put in Context..... | 100 |
| Chapter 7 – Objections | 103 |
| Chapter 8 - Conclusion to Part II | 105 |
| | |
| Part III - What is Outside of our Universe?..... | 107 |
| Chapter 1 - Introduction to Part III..... | 109 |
| Chapter 2 – Simulation Communication Pathways..... | 110 |
| Boxel to Boxel Communication Pathway..... | 111 |
| Boxel to OSU Communication Pathway..... | 115 |
| Chapter 3 - Quantum Entanglement..... | 117 |
| Is Our Universe a Simulation within a Simulation?..... | 119 |
| Chapter 4 – Energy-Dominated Universe | 120 |
| Intelligent Life in an Energy-Dominated Universe | 122 |
| Building a Computer-Simulated Universe | 123 |
| Chapter 5 - Conclusion to "Reality is Virtual" | 125 |
